Parallel imports, repackaging, look-alike products and other types of trademark infringement.

Administrative proceedings for trademark registrations.

2. Competition Law (3hrs/week)

E. Karamanakou.

This course is intended to offer Erasmus students exposure to the origins and theoretical underpinnings of EU Competition Law and Greek Competition Law. Attention will focus on both regulatory and academic analyses, as well as EU and Greek court precedents.

Course Objectives: Along with traditional competition law approaches, students will be acquainted with novel approaches in competition law, embraced by the EU Competition authorities and EU courts, including, but not limited to, the interface of digital economy and competition rules, the assessment of sharing economy schemes, and exclusionary practices of dominant undertakings (self- referencing, abuse of data protection rules).

Contents: Reference will be made to the territorial ambit of EU Competition Rules, the effect of anticompetitive practices on trade between EU Member States, as well as the basic concepts of the economics of competition (perfect competition, monopoly, oligopoly, market definition, market power and dominance, empirical methods for market definition and the assessment of market power). Students will also be guided through the basic concepts and basic “pillars” of the EU Competition and Greek Competition substantive rules. Topics discussed include collusive practices (cartels, agreements on prices and trading conditions, output restrictions, market – sharing and customer allocation agreements, information exchanges, horizontal cooperation agreements and joint ventures); vertical agreements (the Block Exemption Regulation and guidelines, agency agreements, cumulative effect); abuses of dominant position (exclusionary pricing and non-pricing practices, exploitative forms of abuse); merger control (jurisdictional scope of the Merger Regulation, substantive appraisal of concentrations, Merger Regulation procedure, ancillary restraints); and intellectual property rights and EU Competition Rules (technology transfer agreements, trademark licenses, abusive exercise of intellectual property rights, refusal to license intellectual property rights, misuse of regulatory process). Part of the course will deal with the enforcement system of EU competition rules under Regulation 1/2003 (the legal exception system, the European Competition Network and the allocation of cases, the Commission’s powers of investigation and decisions, commitments and settlement, fines for substantive infringements), as well as the options available to the competition authorities and undertakings, including fine settlement, commitments, and leniency. Finally,

students will be familiarized with the intricacies of civil damage litigation principles, in the wake of implementation of EU Directive 2014/104 by the majority of the EU Member-States.

Academic Requirements: Participants are not required to have a basic previous knowledge of European and Competition Law, although previous exposure to it will enhance their understanding. **Teaching Method:** Seminar Format, which requires a high degree of student activity. **Assessment and testing:** Written exam

DEPARTMENTAL COORDINATORS OFFICE HOURS: Wednesday-Friday 11:00-13:00

The mobility period for the Erasmus+ students begin on the orientation day and ends with the examination of the last course.

Please note that changes to the study program should be exceptional, as it has already been agreed upon by all three parties (the student, the sending institution, and the receiving institution). Students can make changes to their Learning Agreements within one month from the first day of the semester.

All Erasmus incoming students must respect the official semester dates and comply with the internal regulations of the host institution. Students are strongly advised not to book return tickets before the official end of the examination period.

Erasmus students cannot take part in resit exams. The official resit period takes place once a year in September and is only available to students who are still enrolled and physically present at the university. Since Erasmus mobilities are time bound and students complete their studies by the end of the semester, they are not eligible to participate.

Thus, please ensure to complete all assessments during the regular exam period!
